# Fibre

## Polyester Staple Fiber

Polyester Staple Fiber (PSF) is somewhat Polyester Fiber made directly from PTA and MEG or PET Chips or from Recycled PET Bottle Flakes. PSF produced using PTA and MEG or PET Chips is known as Virgin PSF and PSF produced using Recycled PET Flakes is called Recycled PSF. 100% virgin PSF is typically unreasonable than recycled PSF and is also more hygienic. Polyester Staple Fiber is generally used in spinning, weaving non-woven.

## Cotton Waste

### Comber Noil (Bleached & Unbleached)

#### Quality Parameters Of Comber Noil

2.5% SL	19.00
50% SL	8.20
UR%	45.24
SFI	24.11
MIC	3.40
TRASH %	0.28

We provide one of the finest qualities Comber Noil. Comber Noil is a by-product of the yarn spinning process, produced when cotton is combed in comber machine to remove short fibers. Because of comber noil being trash free, it can be used for a number of purposes like, manufacturing of pharmaceutical and surgical cotton. Besides this comber noil is also be used in yarn production.

We can also offer you Bleached Comber Noil. It is ideal for making cotton balls, cotton buds and cotton pads. It is manly used in cosmetic field. It is highly hygiene and therefore is appreciated by our clients.

All waste is collected by pneumatic waste collection system and converted into bales. As all preparatory machine used in all th four spinning mills is state of the art, the quality of comber noil is very good.

We are producing world class quality yarn that matches with USTER 5% LEVEL. It is mainly due to best variety of cotton. No doubt we are taking special care of contamination during selection of cotton. For your guidance parameters of Comber Noil are as under :

## Flat (Upper Carded Waste)

Cotton flat is also a by-product of the yarn spinning process, produced in first carding machine. This fiber length is usually longer but has higher trash as compared to comber noil.

Products	Length	Micronaire	Strength	Trash
Flat(A)	20-26 mm	3.0-4.0	22+	4-6%
Falt(B)	20-26 mm	3.0-4.0	22+	8-11%
Flat	20-26 mm	3.0-4.0	22+	15%

## Dropping (Lower Carding Waste)

Droppings or lower carding waste are high in trash. Cotton dropping is obtained during yarn manufacturing. Its low cost and less fiber content makes it ideal for spinning low count yarn.

Products	Length	Micronaire	Trash
Dropping	15-16 mm	3.0-3.5	25%

## Clean Licker-in

Products	Length	Micronaire	Trash
licker-in	19-20 mm	3.0-3.5	16%

## Cotton Yarn Hard Waste

We are the leading Cotton Yarn Waste Suppliers in India. We can offer wide range of cotton yarn that is widely acknowledged for its innumerable uses.
